

4-EnB Setup

Experiment 1

- Showcases frequent handovers occurring.
- No throughput data available
- Walked back and forth between one sides of the room to the other.

Experiment 1 - Walk (No Throughput)

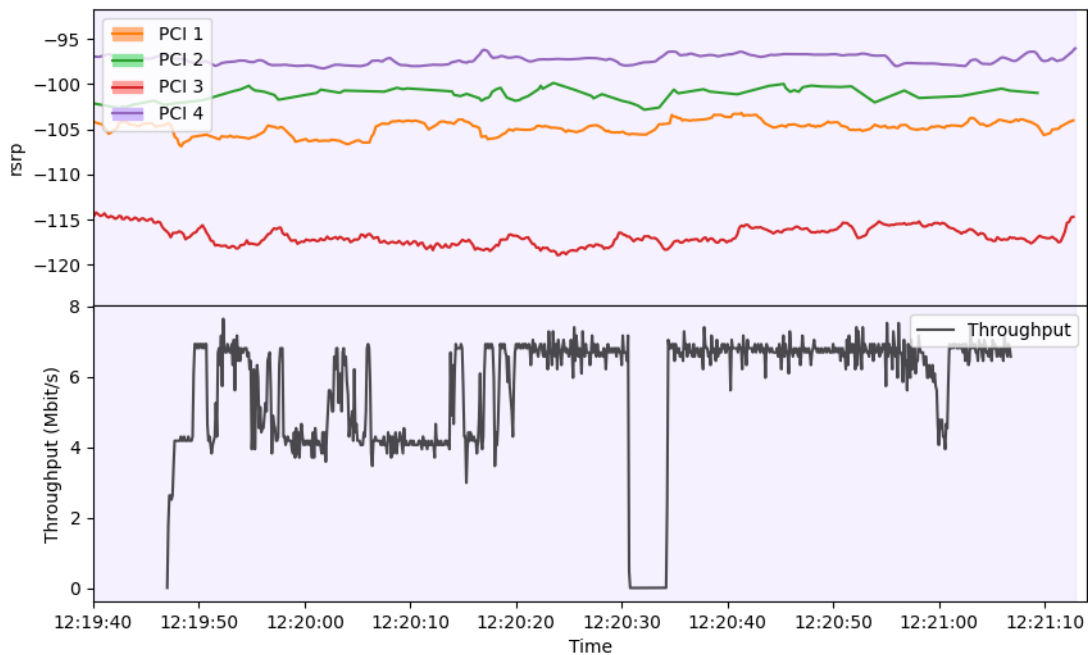

Experiment 2

- Showcases relative stability of the network, but instability of the throughput.

- Kept device and room static

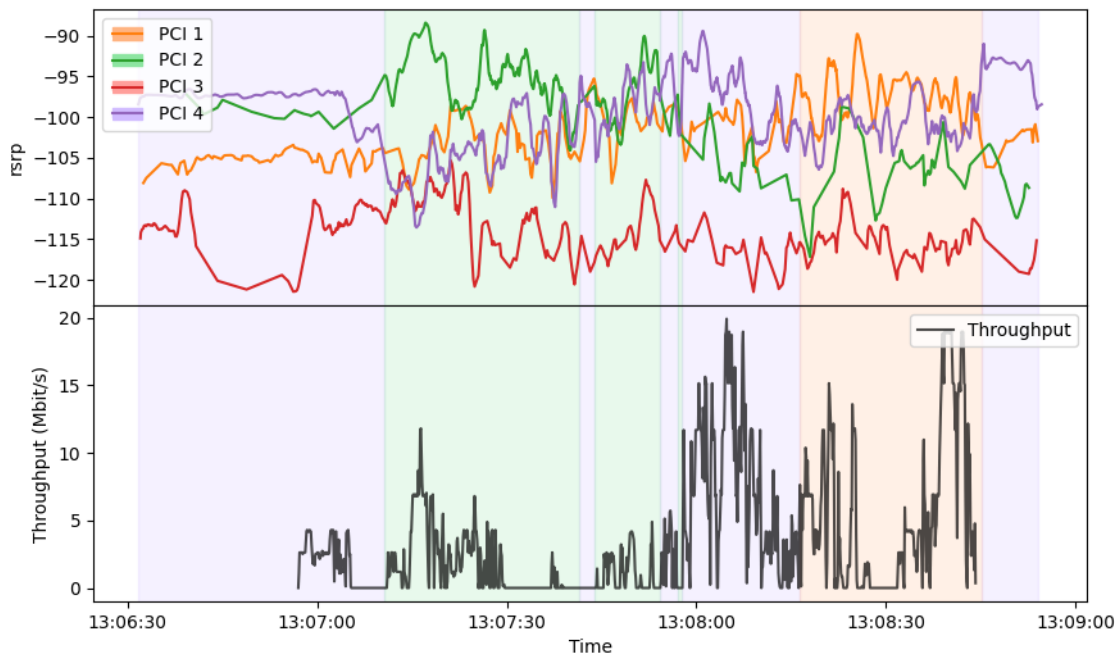

Experiment 2 - Stationary

Experiment 3

- Showcases frequent handovers, as well as very unstable datarate
- Walked around room in a sporadic manner

Experiment 3 - Walk

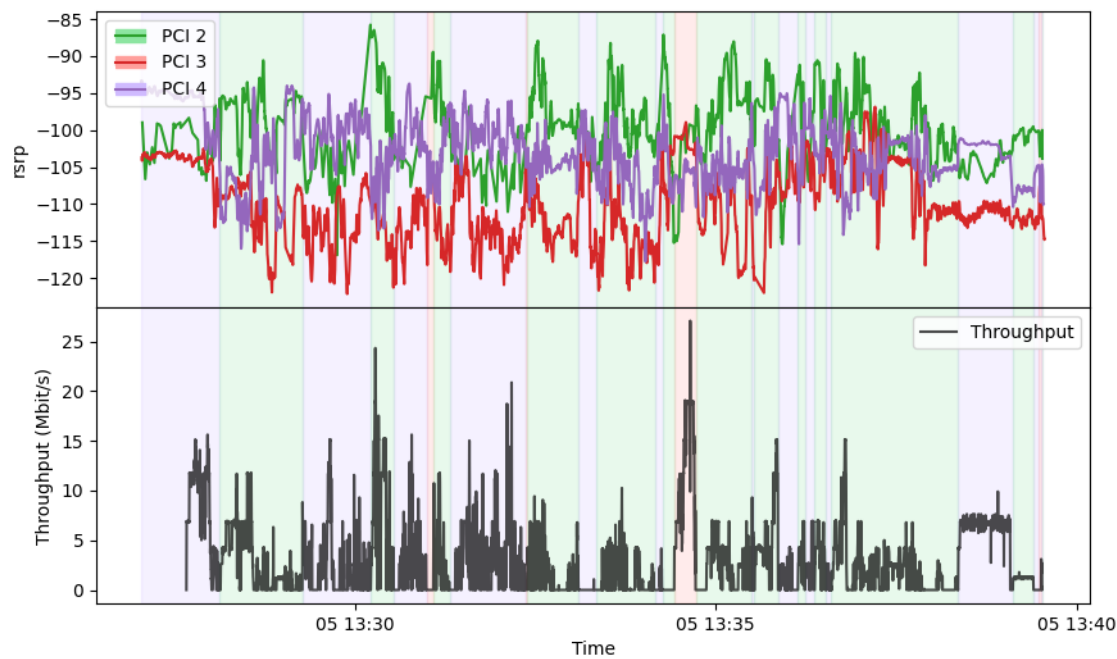

Experiment 4

- Longer 15 minute experiment
- PCI 1 dropped off

- Walked around room in a sporadic manner

Experiment 4 - Walk

Experiment 5

- Another shorter experiment with all 4 enbs

Experiment 5 - Walk
